Number of Race/Ethnicity

5

Number of Students by Parental Level of Education

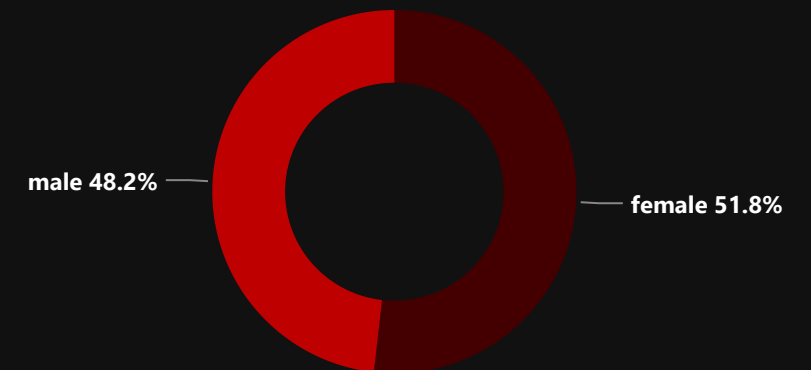

Number of Students

The student demographics report provides valuable insights into the demographic composition of students at our local high school. It aims to assist school planning and the development of effective support systems by examining key demographic aspects.

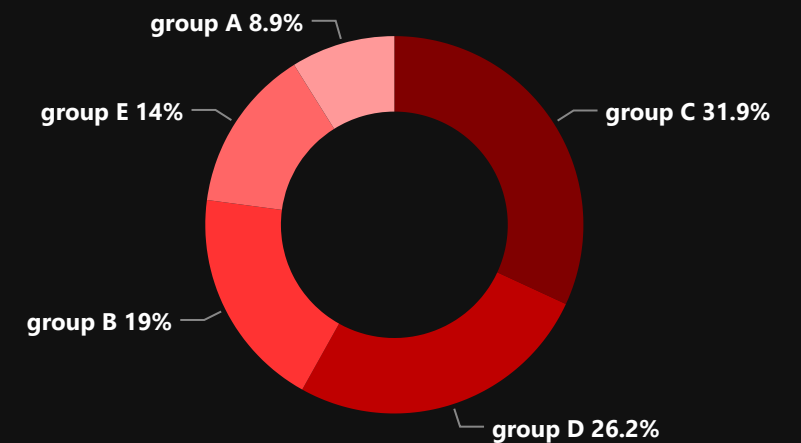

The report explores the gender breakdown and analyses the school's ethnic and cultural diversity, focusing on various racial and ethnic backgrounds. Socioeconomic indicators, such as parental education level, are examined to assess the economic context of students.

By examining these students demographic factors, the report offers a data-driven foundation for decision-making.

Student Demographic

Student Grades

Student Support

Average Math Score

66.09

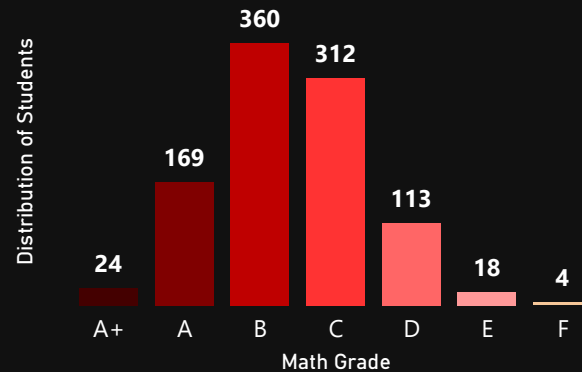

Average Reading Score

69.17

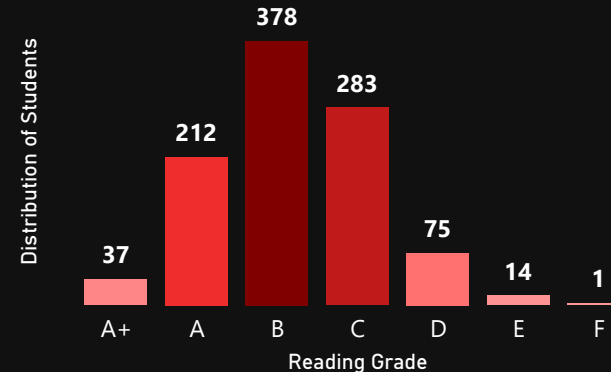

Average Writing Score

68.05

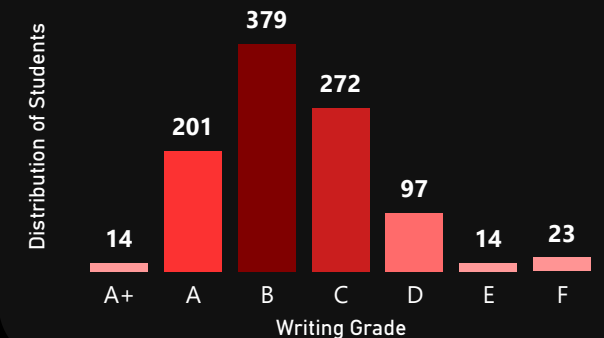

Distribution of Students by Math Grade

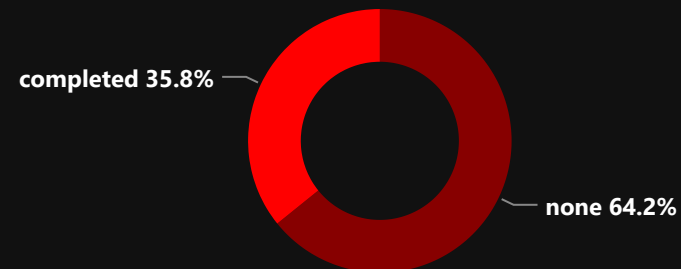

Distribution of Students by Reading Grade

Distribution of Students by Writing Grade

Distribution of Students by test preparation course

The Student Grades Dashboard provides essential data on student performance and test preparation. It features histograms showing grade distributions in math, reading and writing, helping school planning and development teams identify areas for improvement. The included donut chart displays the proportion of students who completed the test preparation course, aiding the school support system in assessing its effectiveness. This dashboard enables data-driven decision-making and improves student outcomes.

STUDENT SUPPORT DASHBOARD

Average Reading Score

43.37

Average Writing Score

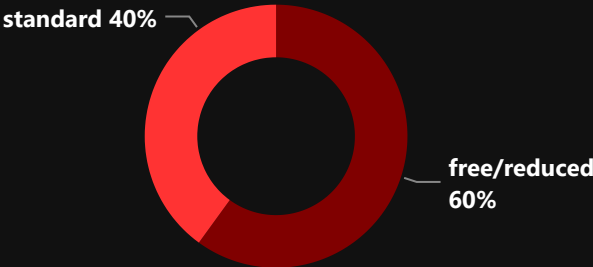

40.92

Number of Students who need Support

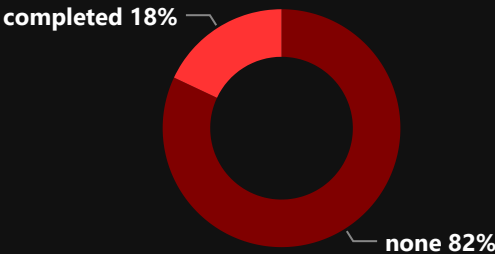

100

The Students Support Dashboard provides insights on students with a Cumulative Score Average (CSA) below 50. It includes a stacked column chart showing distribution of students by ethnicity and gender, a bar graph for parental level of education, and two donut charts for lunch type and test preparation completion. The dashboard helps school planning and support systems identify students in need and target interventions based on demographics and academic factors.
